Summary

I'm a first-year Computer Science student at Brunel University with a strong interest in student wellbeing, community-building, and peer support. Through my experience leading student societies and volunteering in various roles, I've developed a genuine passion for helping others feel welcomed, supported, and engaged. I've worked with diverse groups, organised inclusive events, and provided guidance to peers both academically and socially. Most recently, I was honoured with the Brunel Volunteers Award in recognition of my contributions to student life. I'm now looking to bring that same energy and commitment to the ResLife Ambassador role, helping to create a safe, supportive, and vibrant residential community.

Educational & Supervisory Experience

Founder & President, Positron Society of Science (2020 – 2023)

- Organized and led science-focused workshops and events for school students.
- Managed social media groups and promoted events, enhancing online engagement.
